Do not enter information from the patient's electronic health records, NextGen, Midas, Meditech, etc. The goal of this questionnaire is to identify patient needs, and questions have been selected because we've noticed other patients have needs related to these items. We ask this questionnaire to all our patients to ensure the services we provide are specific to the needs of the community. We want to promote the best services possible, and your responses will help other patients with their medical care and will contribute to the improved health of the community. We really appreciate your participation. While this questionnaire is administered to identify patient needs, we cannot guarantee that we will provide any resources, referrals, or other services. But we will try our best to assist you in fulfilling any needs that arise. Finally, your responses will be confidential and will not affect the quality of care you receive. You do not need to answer any of the questions if you don't want to - just tell us if you don't want to answer a question, and we will move on to the next one.	descriptive
